

HOW DOES YOUR EDIBLE GARDEN GROW?

growarow.org

IT ALL STARTS WITH A PLAN. WHERE'S THE...

SUN? VEGGIES NEED AT LEAST 6 HOURS OF DIRECT SUNLIGHT EACH DAY.

WATER? A RAIN BARREL CAN SUPPLEMENT RAINY DAYS AND TAP WATER.

SPACE? CONSIDER CONTAINER OR VERTICAL GARDENING TO ADD EXTRA ROOM.

AND THE SOIL QUALITY? FEED YOUR SOIL COMPOST FOR NUTRITION AND A GOOD ENVIRONMENT IN WHICH PLANTS CAN GROW.
